### SUMMARY

Proactive Frontend Developer with close to **2 years of experience** building dynamic, responsive web interfaces using modern technologies such as **React, Angular, Gatsby, JavaScript (ES6+), TypeScript, HTML5, and CSS3**. Demonstrated expertise in full-cycle web development by building a company website from scratch using React Gatsby and Contentful. Additionally, contributed to a complex Angular-based content management system, incorporating features like video upload, editing, customer management, and role-based access control. Passionate about delivering efficient, user-focused solutions and constantly seeking opportunities to expand technical skills and embrace new challenges.

**Upper-intermediate (B2) level of English.**

### EXPERIENCE

#### Frontend Developer | 150 Minuten GmbH Nov 2022 – Sep 2024

- Developed the company website using React, Gatsby, and GraphQL integrated with Contentful, enabling non-technical users to easily manage and update dynamic content without altering the codebase.
- Led the development of Angular-based projects, including an admin dashboard with features such as video uploads, user search functionality, and role-based management, as well as a video tracking system for monitoring user engagement.
- Ensured responsive design and seamless cross-browser compatibility for a consistent user experience across all devices.

### EDUCATION

#### Mate academy, Feb 2022 - Oct 2022

Full-time course in Frontend Development

#### **Odessa Polytechnic National University**, 2015 - 2020

Master's Degree in Public Management and Administration

Bachelor's Degree in Foreign Economic Activity Management  
(graduated **with honors**)

I consistently excelled in academics, earning **top prizes** in mathematics Olympiads and maintaining high performance across all subjects. Hold **a medal** for academic success.
